**INDUSTRIE PARIS / 2010**  
PARIS-NORD Villepinte. Stand 5.H.5

WELCOME GH GROUP

A leader in the world of induction and power supply sources thanks to permanent innovation, the quality and excellence of our service

**PROJECTS 2009**  
Design and implementation of a prototype of an universal C.V. Joint hardening and tempering installation based on electromagnetic induction

Induction Heating [Hardening](#), [tempering](#), heating and/or [shrink fitting](#) processes  
Functionalities to improve the heating treatment quality High energy efficiency power supplies  
Functionalities for controlling operation and maintenance Heating by scanning or single-shot  
Manual or automatic installations Pieces handled in horizontal or vertical position
